

STRATEGIC INTRADAY TRADING

OVERVIEW

In trading, there is always a common query to finding the right opportunity. However, this requires a deep understanding of fundamentals through consistent disciplined practice and commitment.

In this programme, we focus on the combination of strategic methods to drill through the multi-layer information to discovering the potential market opportunities as well as trading psychology. Emotional influence can have a surprisingly powerful effect over the strategy planning. Participants in this programme will be having practical exercises to experiment with the methods and applying them to the markets.

LEARNING OBJECTIVE:

- Understanding the principles and mindset towards stocks trading
- Understand how the market movement creates the opportunities and trade strategies
- Identifying the market movement to understand how to route a sustainable, efficient and yet profitable formular
- Financial Management: How to manage overall portfolio risk with number of shares and where to take a loss.
- Trading Psychology: Mastering the skill of Whole Brain State with the optimal emotional fulfilment
